

cl_modbus_tcp_relay
::CbRelayStatus::onEntry

```
graph LR; A[cl_modbus_tcp_relay::CbRelayStatus::onEntry] --> B[cl_modbus_tcp_relay::CbRelayStatus::readSingleChannel];
```

The diagram consists of two rectangular boxes connected by a blue arrow pointing from left to right. The left box is white with a black border and contains the text 'cl_modbus_tcp_relay' followed by '::CbRelayStatus::onEntry' on the next line. The right box is gray with a black border and contains the text 'cl_modbus_tcp_relay' followed by '::CbRelayStatus::readSingle' on the next line, and 'Channel' on the third line.
