

```
boost::statechart::  
event< EvTransitionUnconfigured  
Shutdown< TSourceObject, TOrthogonal > >
```

The diagram shows two class boxes. The top box, representing `boost::statechart::event`, has three horizontal compartments. The first compartment contains the text `boost::statechart::` on the first line, `event< EvTransitionUnconfigured` on the second line, and `Shutdown< TSourceObject, TOrthogonal > >` on the third line. The bottom two compartments are empty. The bottom box, representing `cl_lifecycle_node::EvTransitionUnconfiguredShutdown`, is shaded gray and also has three horizontal compartments. The first compartment contains the text `cl_lifecycle_node::` on the first line, `EvTransitionUnconfiguredShutdown` on the second line, and `< TSourceObject, TOrthogonal >` on the third line. The bottom two compartments are empty. A blue arrow with an open triangular head points from the top of the bottom box to the bottom of the top box, indicating inheritance.

```
cl_lifecycle_node::  
EvTransitionUnconfiguredShutdown  
< TSourceObject, TOrthogonal >
```
