smacc2::state\_reactors  
::EgRandomGenerator::postRandom  
Events

```
graph LR; A["smacc2::state_reactors::EgRandomGenerator::onEntry"] --> C["smacc2::state_reactors::EgRandomGenerator::postRandomEvents"]; B["smacc2::state_reactors::EgRandomGenerator::update"] --> C;
```

The diagram illustrates a function call or dependency relationship. On the left, two white rectangular boxes represent source functions: 'smacc2::state\_reactors::EgRandomGenerator::onEntry' (top) and 'smacc2::state\_reactors::EgRandomGenerator::update' (bottom). On the right, a gray rectangular box represents the target function: 'smacc2::state\_reactors::EgRandomGenerator::postRandomEvents'. Two blue arrows point from the source functions to the target function, indicating that both 'onEntry' and 'update' call or depend on 'postRandomEvents'.
