

smacc2::ISmaccComponent
::requiresComponent

smacc2::ISmaccComponent
::requiresComponent

smacc2::ISmaccClient
::getComponents

```
graph LR; A[smacc2::ISmaccComponent  
::requiresComponent] --> C[smacc2::ISmaccClient  
::getComponents]; B[smacc2::ISmaccComponent  
::requiresComponent] --> C;
```

The diagram illustrates a dependency or relationship. On the left, there are two identical white rectangular boxes, each containing the text 'smacc2::ISmaccComponent' followed by '::requiresComponent' on a new line. On the right, there is a single gray rectangular box containing the text 'smacc2::ISmaccClient' followed by '::getComponents' on a new line. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that the 'requiresComponent' method of 'ISmaccComponent' depends on or uses the 'getComponents' method of 'ISmaccClient'.
