The diagram illustrates a control flow. Two white boxes on the left represent entry points: 'cl_modbus_tcp_relay::CbAllRelaysOff::onEntry' and 'cl_modbus_tcp_relay::CbAllRelaysOn::onEntry'. Both have blue arrows pointing to a gray box on the right labeled 'cl_modbus_tcp_relay::CpModbusRelay::writeAllCoils'. A blue curved arrow also originates from the top of the gray box and points back to itself, indicating a self-loop or recursive call.
