

boost::statechart::
event< EvConnectionLost
< TSource, TOrthogonal > >

```
classDiagram
    class Base["boost::statechart::event< EvConnectionLost< TSource, TOrthogonal > >"]
    class Derived["cl_gcalcli::EvConnectionLost< TSource, TOrthogonal >"]
    Base <|-- Derived
```

The diagram illustrates an inheritance relationship. The base class, `boost::statechart::event< EvConnectionLost< TSource, TOrthogonal > >`, is shown in a white box with a black border. The derived class, `cl_gcalcli::EvConnectionLost< TSource, TOrthogonal >`, is shown in a gray box with a black border. A blue arrow with a hollow triangular head points from the derived class to the base class, indicating that the derived class inherits from the base class.

cl_gcalcli::EvConnection
Lost< TSource, TOrthogonal >
