

```
boost::statechart::  
event< EvStateRequestFinish  
      < StateType > >
```

The diagram shows a class hierarchy. The base class, `boost::statechart::event< EvStateRequestFinish < StateType > >`, is represented by a white box with a black border. It has two empty rectangular slots below its name. The derived class, `smacc2::default_events::EvStateRequestFinish < StateType >`, is represented by a gray box with a black border. It also has two empty rectangular slots below its name. A blue arrow points from the top of the gray box to the bottom of the white box, indicating inheritance.

```
smacc2::default_events  
::EvStateRequestFinish  
  < StateType >
```
