

```
boost::statechart::  
event< EvTransitionOnError  
Failure< TSourceObject,  
        TOrthogonal > >
```

The diagram illustrates an inheritance relationship between two C++ classes. The base class, `boost::statechart::event< EvTransitionOnErrorFailure< TSourceObject, TOrthogonal > >`, is shown in a white box at the top. The derived class, `cl_lifecycle_node::EvTransitionOnErrorFailure< TSourceObject, TOrthogonal >`, is shown in a gray box at the bottom. A blue arrow with an open triangular head points from the derived class to the base class, indicating that the derived class inherits from the base class.

```
cl_lifecycle_node::  
EvTransitionOnErrorFailure  
< TSourceObject, TOrthogonal >
```
