

```
boost::statechart::  
event< EvCountdownEnd  
< TReactorType, EmptyObjectTag > >
```

The diagram illustrates a specialization relationship. At the top is a white box containing the C++ code for `boost::statechart::event< EvCountdownEnd < TReactorType, EmptyObjectTag > >`. Below it is a grey box containing the code for `smacc2::state_reactors::EvCountdownEnd< TReactorType, TReactorTag >`. A blue arrow points from the grey box up to the white box, indicating that the grey box is a specialization of the white box.

```
smacc2::state_reactors  
::EvCountdownEnd< TReactorType,  
TReactorTag >
```
