

cl_lifecycle_node::
CbDeactivate::onEntry

cl_lifecycle_node::
CbDeactivateOnExit::
onExit

cl_lifecycle_node::
CLifecycleNode::deactivate

```
graph LR; A["cl_lifecycle_node:: CbDeactivate::onEntry"] --> C["cl_lifecycle_node:: CLifecycleNode::deactivate"]; B["cl_lifecycle_node:: CbDeactivateOnExit:: onExit"] --> C;
```

The diagram illustrates a mapping from two source functions to a single target function. On the left, two white rectangular boxes with black borders contain the source function names. The top box contains 'cl_lifecycle_node:: CbDeactivate::onEntry' and the bottom box contains 'cl_lifecycle_node:: CbDeactivateOnExit:: onExit'. On the right, a gray rectangular box with a black border contains the target function name 'cl_lifecycle_node:: CLifecycleNode::deactivate'. Two blue arrows originate from the right side of the source boxes and point towards the left side of the target box, indicating that both source functions are mapped to or implemented by the target function.
