

```
boost::statechart::  
event< EvTransitionOnActivate  
Success< TSourceObject, TOrthogonal > >
```

The diagram shows two class boxes. The top box, representing `boost::statechart::event`, is white with a black border and contains the text `boost::statechart::event< EvTransitionOnActivateSuccess< TSourceObject, TOrthogonal > >`. The bottom box, representing `cl_lifecycle_node::EvTransitionOnActivateSuccess`, is gray with a black border and contains the text `cl_lifecycle_node::EvTransitionOnActivateSuccess< TSourceObject, TOrthogonal >`. A blue arrow with an open triangular head points from the bottom box to the top box, indicating that the bottom class inherits from the top class.

```
cl_lifecycle_node::  
EvTransitionOnActivateSuccess  
< TSourceObject, TOrthogonal >
```
