

```
sc::event< EvTopicMessage  
Timeout< TSource, TOrthogonal > >
```

A UML class diagram showing inheritance. The base class, `sc::event`, is represented by a white box with a black border. It contains the text `sc::event< EvTopicMessage` on the first line and `Timeout< TSource, TOrthogonal > >` on the second line. Below this text are two empty rectangular compartments. The derived class, `cl_generic_sensor`, is represented by a gray box with a black border. It contains the text `cl_generic_sensor::` on the first line, `components::EvTopicMessage` on the second line, and `Timeout< TSource, TOrthogonal >` on the third line. Below this text are two empty rectangular compartments. A blue arrow with a hollow triangular head points from the top of the `cl_generic_sensor` box to the bottom of the `sc::event` box, indicating that `cl_generic_sensor` inherits from `sc::event`.

```
cl_generic_sensor::  
components::EvTopicMessage  
Timeout< TSource, TOrthogonal >
```
