The diagram illustrates a class hierarchy. At the top is the base class 'TCbRelativeMotion', represented by a grey rectangle with three horizontal sections. Below it is the derived class 'cl_nav2z::CbRetry<TCbRelativeMotion>', shown as a white rectangle with three sections. A blue arrow with an open triangular head points from the derived class to the base class, indicating inheritance. The derived class's second section contains a private attribute '- odomTracker_', and its third section contains two public methods: '+ CbRetry()' and '+ onEntry()'.
