The diagram illustrates a dependency or relationship where three methods from the `smacc2::ISmaccOrthogonal` interface (or class) are associated with a single method, `smacc2::ISmaccOrthogonal::getName`. The three methods on the left are `addClientBehavior`, `initState`, and `runtimeConfigure`. Each of these has a blue arrow pointing towards the `getName` method box on the right. The `getName` box is shaded gray, while the others are white with black borders.
