

```
boost::statechart::  
event< EvTransitionActiveShutdown  
    < TSourceObject, TOrthogonal > >
```

The diagram shows a class hierarchy. At the bottom is a grey-shaded class box for `cl_lifecycle_node::EvTransitionActiveShutdown`. A blue arrow with an open triangular head points from this box to the top of a white box representing `boost::statechart::event`. This indicates that `cl_lifecycle_node::EvTransitionActiveShutdown` inherits from `boost::statechart::event`.

```
cl_lifecycle_node::  
EvTransitionActiveShutdown  
< TSourceObject, TOrthogonal >
```
