

cl_lifecycle_node::
CbShutdown::onEntry

```
graph LR; A["cl_lifecycle_node::  
CbShutdown::onEntry"] --> B["cl_lifecycle_node::  
CLifecycleNode::shutdown"]; B --> C["cl_lifecycle_node::  
CLifecycleNode::changeState"];
```

The diagram illustrates a three-step process for lifecycle node shutdown. It begins with a grey box containing the text 'cl_lifecycle_node:: CbShutdown::onEntry'. A blue arrow points from this box to a white box containing 'cl_lifecycle_node:: CLifecycleNode::shutdown'. A second blue arrow points from this white box to a final white box containing 'cl_lifecycle_node:: CLifecycleNode::changeState'.
