

```
boost::statechart::  
event< EvIncorrectInitialPosition  
      < AsyncCB, Orthogonal > >
```

The diagram shows two class boxes. The top box is white and contains the definition of `boost::statechart::event< EvIncorrectInitialPosition < AsyncCB, Orthogonal > >`. The bottom box is gray and contains the definition of `cl_moveit2z::EvIncorrectInitialPosition< AsyncCB, Orthogonal >` with a public attribute `+ trajectory`. A blue arrow points from the bottom box to the top box, indicating that the bottom class inherits from the top class.

```
cl_moveit2z::EvIncorrect  
InitialPosition< AsyncCB,  
                Orthogonal >
```

```
+    trajectory
```
