

```
boost::statechart::  
event< EvKeyPressP<  
    TSource, TOrthogonal > >
```

The diagram illustrates an inheritance relationship. At the bottom is a grey rectangular box representing the base class `cl_keyboard::components::EvKeyPressP`. It contains the text `cl_keyboard::components` on the first line, `::EvKeyPressP< TSource,` on the second line, and `TOrthogonal >` on the third line. Above this box is a white rectangular box representing the derived class `boost::statechart::event`. It contains the text `boost::statechart::` on the first line, `event< EvKeyPressP<` on the second line, and `TSource, TOrthogonal > >` on the third line. Two blue arrows point upwards from the top edge of the grey box to the bottom edge of the white box, indicating that the grey box inherits from the white box.

```
cl_keyboard::components  
::EvKeyPressP< TSource,  
    TOrthogonal >
```
