Events

```
graph LR; A["smacc2::state_reactors::EgRandomGenerator::onEntry"] --> C["smacc2::state_reactors::EgRandomGenerator::postRandomEvents"]; B["smacc2::state_reactors::EgRandomGenerator::update"] --> C;
```

The diagram illustrates a function call or dependency relationship. On the left, two white rectangular boxes represent source functions: 'smacc2::state_reactors::EgRandomGenerator::onEntry' (top) and 'smacc2::state_reactors::EgRandomGenerator::update' (bottom). On the right, a larger gray rectangular box represents the target function: 'smacc2::state_reactors::EgRandomGenerator::postRandomEvents'. Two blue arrows point from the right side of each source box to the left side of the target box, indicating that both 'onEntry' and 'update' functions call or depend on 'postRandomEvents'.
