

```
boost::statechart::  
event< EvKeyPressW<  
    TSource, TOrthogonal > >
```

The diagram shows two class boxes. The top box is white and represents the base class `boost::statechart::event< EvKeyPressW< TSource, TOrthogonal > >`. The bottom box is gray and represents the derived class `cl_keyboard::components::EvKeyPressW< TSource, TOrthogonal >`. A blue arrow with an open triangular head points from the bottom box to the top box, indicating inheritance.

```
cl_keyboard::components  
::EvKeyPressW< TSource,  
    TOrthogonal >
```
