

smacc2::ISmaccOrthogonal
::addClientBehavior

smacc2::ISmaccOrthogonal
::initState

smacc2::ISmaccOrthogonal
::runtimeConfigure

smacc2::ISmaccOrthogonal
::getName

```
graph LR; A[smacc2::ISmaccOrthogonal::addClientBehavior] --> D[smacc2::ISmaccOrthogonal::getName]; B[smacc2::ISmaccOrthogonal::initState] --> D; C[smacc2::ISmaccOrthogonal::runtimeConfigure] --> D;
```

The diagram illustrates a dependency or inheritance relationship. On the left, three white rectangular boxes are stacked vertically. Each box contains the text 'smacc2::ISmaccOrthogonal' followed by a method name on a new line: 'addClientBehavior', 'initState', and 'runtimeConfigure' respectively. On the right, there is a single gray rectangular box containing the text 'smacc2::ISmaccOrthogonal' followed by the method name 'getName' on a new line. Three blue arrows originate from the right side of the three white boxes and point towards the left side of the gray box, indicating that the three methods on the left are associated with or depend on the 'getName' method on the right.
