

cl_lifecyclenode::CbDeactivate
::onEntry

cl_lifecyclenode::CbDeactivate
OnExit::onExit

cl_lifecyclenode::ClLifecycle
Node::deactivate

```
graph LR; A[cl_lifecyclenode::CbDeactivate::onEntry] --> C[cl_lifecyclenode::ClLifecycleNode::deactivate]; B[cl_lifecyclenode::CbDeactivateOnExit::onExit] --> C;
```

The diagram illustrates a mapping from two source functions to a single target function. On the left, two white rectangular boxes with black borders contain the source function names. The top box contains 'cl_lifecyclenode::CbDeactivate::onEntry' and the bottom box contains 'cl_lifecyclenode::CbDeactivateOnExit::onExit'. On the right, a gray rectangular box with a black border contains the target function name 'cl_lifecyclenode::ClLifecycleNode::deactivate'. Two blue arrows point from the right side of each source box to the left side of the target box, indicating the mapping.
