

```
smacc2::client_bases  
::SmaccActionClientBase  
::onStateOrthogonalAllocation
```

The diagram consists of two rectangular boxes connected by a blue arrow pointing from left to right. The left box is white with a black border and contains three lines of C++ code. The right box is gray with a black border and contains three lines of C++ code, where the last line is indented. The blue arrow indicates a flow or transition from the state allocation in the first box to the feedback loop in the second box.

```
smacc2::client_bases  
::SmaccActionClientBase  
    ::onFeedback
```
