

```
boost::statechart::  
event< EvKeyPressP<  
    TSource, TOrthogonal > >
```

The diagram illustrates an inheritance relationship. At the bottom is a grey rectangular box representing the base class `cl_keyboard::components::EvKeyPressP`. It contains three horizontal sections, with the top one holding the class name. Above this box is a white rectangular box representing the derived class `boost::statechart::event`. It also contains three horizontal sections, with the top one holding the class name. Two blue arrows point upwards from the top edge of the grey box to the bottom edge of the white box, indicating that `boost::statechart::event` inherits from `cl_keyboard::components::EvKeyPressP`.

```
cl_keyboard::components  
::EvKeyPressP< TSource,  
    TOrthogonal >
```
