

```
boost::statechart::  
event< EvKeyPressF<  
    TSource, TOrthogonal > >
```

The diagram illustrates an inheritance relationship between two C++ classes. At the top is a white box representing the base class `boost::statechart::event< EvKeyPressF< TSource, TOrthogonal > >`. It is divided into three horizontal sections, with the first containing the class name. At the bottom is a gray box representing the derived class `cl_keyboard::components::EvKeyPressF< TSource, TOrthogonal >`, also divided into three horizontal sections. Two blue arrows point upwards from the top of the gray box to the bottom of the white box, indicating that the gray class inherits from the white class.

```
cl_keyboard::components  
::EvKeyPressF< TSource,  
    TOrthogonal >
```
