

```
boost::statechart::  
event< EvTransitionActiveShutdown  
    < TSourceObject, TOrthogonal > >
```

The diagram illustrates an inheritance relationship between two C++ classes. At the top is a white box representing the base class `boost::statechart::event< EvTransitionActiveShutdown < TSourceObject, TOrthogonal > >`. Below it is a gray box representing the derived class `cl_lifecyclenode::EvTransitionActiveShutdown< TSourceObject, TOrthogonal >`. A blue arrow points from the derived class box up to the base class box, indicating that the derived class inherits from the base class.

```
cl_lifecyclenode::EvTransition  
ActiveShutdown< TSourceObject,  
    TOrthogonal >
```
