

cl\_lifecycle\_node::  
CbDeactivate::onEntry

cl\_lifecycle\_node::  
CbDeactivateOnExit::  
onExit

cl\_lifecycle\_node::  
CLifecycleNode::deactivate

```
graph LR; A["cl_lifecycle_node:: CbDeactivate::onEntry"] --> C["cl_lifecycle_node:: CLifecycleNode::deactivate"]; B["cl_lifecycle_node:: CbDeactivateOnExit:: onExit"] --> C;
```

The diagram illustrates a mapping from two source functions to a single target function. On the left, two white boxes with black borders contain the source function names. The top box contains 'cl\_lifecycle\_node:: CbDeactivate::onEntry' and the bottom box contains 'cl\_lifecycle\_node:: CbDeactivateOnExit:: onExit'. On the right, a gray box with a black border contains the target function name 'cl\_lifecycle\_node:: CLifecycleNode::deactivate'. Two blue arrows point from the right side of each source box to the left side of the target box, indicating that both source functions are mapped to the target function.
