

```
boost::statechart::  
event< EvKeyPressT<  
    TSource, TOrthogonal > >
```

The diagram illustrates an inheritance relationship between two C++ classes. At the top is a white box representing the base class `boost::statechart::event< EvKeyPressT< TSource, TOrthogonal > >`. It has two empty rectangular sections below the text. At the bottom is a gray box representing the derived class `cl_keyboard::components::EvKeyPressT< TSource, TOrthogonal >`, also with two empty rectangular sections below the text. Two blue arrows point upwards from the top of the gray box to the bottom of the white box, indicating that the gray class inherits from the white class.

```
cl_keyboard::components  
::EvKeyPressT< TSource,  
    TOrthogonal >
```
