

```
boost::statechart::  
event< EvTransitionOnError  
Error< TSourceObject, TOrthogonal > >
```

The diagram illustrates an inheritance relationship. A light gray box at the top represents the base class `boost::statechart::event< EvTransitionOnError Error< TSourceObject, TOrthogonal > >`. It has two empty rectangular compartments below the text. A dark gray box at the bottom represents the derived class `cl_lifecyclenode::EvTransitionOnError< TSourceObject, TOrthogonal >`, also with two empty compartments. A blue arrow with an open triangular head points from the top of the derived class box to the bottom of the base class box, indicating that the derived class inherits from the base class.

```
cl_lifecyclenode::EvTransition  
OnErrorError< TSourceObject,  
TOrthogonal >
```
