

```
boost::statechart::  
event< EvActionResult  
< TSource, TOrthogonal > >
```

The diagram shows a class hierarchy. The base class, `boost::statechart::event< EvActionResult< TSource, TOrthogonal > >`, is represented by a white box with a black border. The derived class, `smacc2::default_events::EvActionResult< TSource, TOrthogonal >`, is represented by a gray box with a black border. A blue arrow with an open triangular head points from the derived class box to the base class box, indicating inheritance.

```
smacc2::default_events  
::EvActionResult< TSource,  
TOrthogonal >
```
