

TCbRelativeMotion

```
classDiagram
    class TCbRelativeMotion {
    }
    class cl_nav2z_CbRetry["cl_nav2z::CbRetry<TCbRelativeMotion>"] {
        - odomTracker_
        + CbRetry()
        + onEntry()
        + CbRetry()
        + onEntry()
    }
    cl_nav2z_CbRetry --|> TCbRelativeMotion
```

The diagram illustrates a class hierarchy. At the top is the 'TCbRelativeMotion' class, represented by a grey box with three horizontal compartments. Below it is the 'cl_nav2z::CbRetry<TCbRelativeMotion>' class, shown as a white box with three compartments. The top compartment of the lower class contains its name. The middle compartment lists a private attribute '- odomTracker_'. The bottom compartment lists four public methods: '+ CbRetry()', '+ onEntry()', '+ CbRetry()', and '+ onEntry()'. Two blue arrows point from the bottom of the lower class box to the bottom of the upper class box, indicating inheritance.
