

```
boost::statechart::  
event< EvKeyPressQ<  
    TSource, TOrthogonal > >
```

The diagram illustrates an inheritance relationship. At the bottom is a grey rectangular box representing the base class `cl_keyboard::components`. It contains the text `cl_keyboard::components` on the first line, `::EvKeyPressQ< TSource,` on the second line, and `TOrthogonal >` on the third line. Above this box is a white rectangular box representing the derived class `boost::statechart::event`. It contains the text `boost::statechart::` on the first line, `event< EvKeyPressQ<` on the second line, and `TSource, TOrthogonal > >` on the third line. Two blue arrows point upwards from the top edge of the grey box to the bottom edge of the white box, indicating that `cl_keyboard::components` inherits from `boost::statechart::event`.

```
cl_keyboard::components  
::EvKeyPressQ< TSource,  
    TOrthogonal >
```
