The diagram illustrates a three-step process for AprilTag detection. It begins with the `cl_isaac_apriltag::CbDetectAprilTag::onEntry` function, which triggers the `cl_isaac_apriltag::CbDetectAprilTag::onAprilTagDetected` callback. This callback then leads to the `cl_isaac_apriltag::CpAprilTagMissionState::selectTag` function, which is highlighted in a gray box to indicate it is the final or active step in the sequence.
