

cl_nav2z::CpCostmapSwitch
::disable

cl_nav2z::CpCostmapSwitch
::enable

cl_nav2z::CpCostmapSwitch
::onInitialize

cl_nav2z::CpCostmapSwitch
::getStandardCostmapName

```
graph LR; A[cl_nav2z::CpCostmapSwitch::disable] --> D[cl_nav2z::CpCostmapSwitch::getStandardCostmapName]; B[cl_nav2z::CpCostmapSwitch::enable] --> D; C[cl_nav2z::CpCostmapSwitch::onInitialize] --> D;
```

The diagram illustrates a dependency or inheritance relationship. On the left, there are three white rectangular boxes, each containing a text label for a function or method of the `cl_nav2z::CpCostmapSwitch` class. These labels are `::disable`, `::enable`, and `::onInitialize`. On the right, there is a single gray rectangular box containing the label `::getStandardCostmapName`. Three blue arrows originate from the right side of each white box and point towards the left side of the gray box, indicating that the three methods on the left are associated with or depend on the method on the right.
