

```
boost::statechart::  
event< EvKeyPressY<  
    TSource, TOrthogonal > >
```

The diagram illustrates an inheritance relationship between two C++ classes. At the top is a white box representing the base class `boost::statechart::event< EvKeyPressY< TSource, TOrthogonal > >`. It has three horizontal sections, with the first containing the class name. At the bottom is a gray box representing the derived class `cl_keyboard::components::EvKeyPressY< TSource, TOrthogonal >`. It also has three horizontal sections, with the first containing the class name. Two blue arrows point upwards from the top of the gray box to the bottom of the white box, indicating that the gray class inherits from the white class.

```
cl_keyboard::components  
::EvKeyPressY< TSource,  
    TOrthogonal >
```
