The diagram illustrates a control flow. On the left, two white rectangular boxes represent entry points: 'cl_modbus_tcp_relay::CbAllRelaysOff::onEntry' (top) and 'cl_modbus_tcp_relay::CbAllRelaysOn::onEntry' (bottom). Blue arrows point from both of these boxes to a single gray rectangular box on the right labeled 'cl_modbus_tcp_relay::CpModbusRelay::writeAllCoils'. Additionally, a blue curved arrow originates from the top of the gray box and points back to its top, indicating a self-loop or recursive call.
