

```
boost::statechart::  
event< EvMoveGroupMotionExecution  
Succeeded< TSource, TOrthogonal > >
```

The diagram illustrates an inheritance relationship between two C++ event types. The base class, `boost::statechart::event< EvMoveGroupMotionExecutionSucceeded< TSource, TOrthogonal > >`, is shown in a white box at the top. The derived class, `cl_moveit2z::EvMoveGroupMotionExecutionSucceeded< TSource, TOrthogonal >`, is shown in a gray box at the bottom. A blue arrow with an open triangular head points from the derived class box to the base class box, indicating that the derived class inherits from the base class.

```
cl_moveit2z::EvMoveGroup  
MotionExecutionSucceeded  
< TSource, TOrthogonal >
```
