

smacc2_client_library
/moveit2z_client/include
/moveit2z_client/client
_behaviors/cb_execute_last
_trajectory.hpp

```
graph BT; A["smacc2_client_library  
/moveit2z_client/src  
/moveit2z_client/client  
_behaviors/cb_execute_last  
_trajectory.cpp"] --> C["smacc2_client_library  
/moveit2z_client/include  
/moveit2z_client/client  
_behaviors/cb_execute_last  
_trajectory.hpp"]; B["smacc2_client_library  
/moveit2z_client/include  
/moveit2z_client/client  
_behaviors.hpp"] --> C;
```

The diagram illustrates a dependency structure. At the top is a grey box containing the header file path: `smacc2_client_library /moveit2z_client/include /moveit2z_client/client _behaviors/cb_execute_last _trajectory.hpp`. Below it are two white boxes. The box on the left contains the path to another header file: `smacc2_client_library /moveit2z_client/include /moveit2z_client/client _behaviors.hpp`. The box on the right contains the path to a source file: `smacc2_client_library /moveit2z_client/src /moveit2z_client/client _behaviors/cb_execute_last _trajectory.cpp`. Two blue arrows point from the bottom of these two boxes towards the top box, indicating that both the source file and the other header file depend on the top header file.

smacc2_client_library
/moveit2z_client/include
/moveit2z_client/client
_behaviors.hpp
