

```
boost::statechart::  
event< EvTransitionOnError  
Success< TSourceObject,  
TOrthogonal > >
```

The diagram shows a class hierarchy. The base class, `boost::statechart::event< EvTransitionOnErrorSuccess< TSourceObject, TOrthogonal > >`, is represented by a white box with a black border. It has two empty rectangular compartments below the text. The derived class, `cl_lifecycle::EvTransitionOnErrorSuccess< TSourceObject, TOrthogonal >`, is represented by a gray box with a black border, also having two empty rectangular compartments. A blue arrow with an open triangular head points from the top of the derived class box to the bottom of the base class box, indicating inheritance.

```
cl_lifecycle::EvTransition  
OnErrorSuccess< TSourceObject,  
TOrthogonal >
```
