

```
boost::statechart::  
event< EvTopicMessage  
< TSource, TOrthogonal,  
typename TSource::TMessageType > >
```

The diagram shows a class hierarchy. At the top is a box representing the base class `boost::statechart::event< EvTopicMessage< TSource, TOrthogonal, typename TSource::TMessageType > >`. Below it is a box representing the derived class `smacc2::default_events::EvTopicMessage< TSource, TOrthogonal, TMessageType >`. A blue arrow with an open triangle head points from the derived class box up to the base class box, indicating inheritance.

```
smacc2::default_events  
::EvTopicMessage< TSource,  
TOrthogonal, TMessageType >
```

```
+   msgData
```

```
+   getEventLabel()
```
