

optional< std::string >

```
classDiagram
    class optional_string["optional< std::string >"]
    class cl_nav2z_CbNavigateGlobalPositionOptions["cl_nav2z::CbNavigateGlobalPositionOptions"]
    optional_string o-- cl_nav2z_CbNavigateGlobalPositionOptions : +controllerName_<br>+goalChecker_
```

The diagram shows two class boxes. The top box, representing 'optional< std::string >', has three horizontal compartments. The bottom box, representing 'cl_nav2z::CbNavigateGlobalPositionOptions', has three horizontal compartments and is shaded gray. A blue line connects the bottom compartment of the top box to the top compartment of the bottom box, ending in a hollow diamond. To the right of this line, the attributes '+controllerName_' and '+goalChecker_' are listed.

+controllerName_
