

boost::statechart::
event< EvConnectionRestored
< TSource, TOrthogonal > >

```
classDiagram
    class boost_statechart_event["boost::statechart::event< EvConnectionRestored< TSource, TOrthogonal > >"]
    class cl_gcalcli_ev_connection_restored["cl_gcalcli::EvConnectionRestored< TSource, TOrthogonal >"]
    boost_statechart_event <|-- cl_gcalcli_ev_connection_restored
```

The diagram illustrates an inheritance relationship. At the top is a white box representing the base class: boost::statechart::event< EvConnectionRestored< TSource, TOrthogonal > >. Below it is a grey box representing the derived class: cl_gcalcli::EvConnectionRestored< TSource, TOrthogonal >. A blue arrow points from the derived class box up to the base class box, indicating that the derived class inherits from the base class.

cl_gcalcli::EvConnection
Restored< TSource, TOrthogonal >
