

```
boost::statechart::  
event< EvKeyPressE<  
    TSource, TOrthogonal > >
```

The diagram illustrates an inheritance relationship. At the bottom is a grey rectangular box representing the base class `cl_keyboard::components::EvKeyPressE`. It contains the text `cl_keyboard::components::EvKeyPressE< TSource, TOrthogonal >` in its top section, with two empty sections below. Above this box is a white rectangular box representing the derived class `boost::statechart::event`. It contains the text `boost::statechart::event< EvKeyPressE< TSource, TOrthogonal > >` in its top section, with two empty sections below. Two blue arrows point upwards from the top edge of the grey box to the bottom edge of the white box, indicating that the grey box inherits from the white box.

```
cl_keyboard::components  
::EvKeyPressE< TSource,  
    TOrthogonal >
```
