

```
boost::statechart::  
event< EvKeyPressR<  
    TSource, TOrthogonal > >
```

The diagram illustrates an inheritance relationship. A blue arrow points from the `cl_keyboard::components::EvKeyPressR` class (bottom) to the `boost::statechart::event` class (top). Both classes are represented as boxes with three horizontal compartments. The top compartment contains the class name and template parameters, while the bottom two compartments are empty.

```
cl_keyboard::components  
::EvKeyPressR< TSource,  
    TOrthogonal >
```
