

```
boost::statechart::  
event< EvTransitionInactive  
Shutdown< TSourceObject,  
TOrthogonal > >
```

A UML class diagram showing inheritance. The base class, `boost::statechart::event< EvTransitionInactiveShutdown< TSourceObject, TOrthogonal > >`, is represented by a white box with a black border and is divided into three horizontal compartments. The top compartment contains the class name, the middle is empty, and the bottom is empty. The derived class, `cl_lifecyclenode::EvTransitionInactiveShutdown< TSourceObject, TOrthogonal >`, is represented by a gray box with a black border and is also divided into three horizontal compartments. The top compartment contains the class name, and the middle and bottom compartments are empty. A blue arrow with an open triangular head points from the top of the derived class box to the bottom of the base class box, indicating inheritance.

```
cl_lifecyclenode::EvTransition  
InactiveShutdown< TSourceObject,  
TOrthogonal >
```
